Service	Service Description
Partial Hospitalization Treatment Program	A Claim Administrator approved planned program of a Hospital or Substance Use Disorder Treatment Facility for the treatment of Mental Illness or Substance Use Disorder Treatment in which patients spend days s. This behavioral healthcare is typically 5 to 8 hours per day, 5 days per week (not less than 20 hours of treatment services per week). The program is staffed similarly to the day shift of an inpatient unit, i.e. medically supervised by a Physician and nurse. The program shall ensure a psychiatrist sees the patient face to face at least once a week and it otherwise available, in person or by telephone, to provide assistance and direction to the program as needed. Participants at this level of care do not require 24 hour supervision and are not considered a resident at the program. Requirements: the Claim Administrator requires that any Mental Illness and/or Substance Use Disorder Partial Hospitalization Treatment Program must be licensed in the state where it is located, or accredited by a national organization that is recognized by the Claim Administrator as set forth in its current credentialing policy, and otherwise meets all other credentialing requirements set forth in such policy.
Applied Behavior Analysis (ABA)	Applied behavior analysis is a method of therapy utilized to improve or change specific behaviors of members who have a diagnosis within the Pervasive and specific developmental disorders category of ICD-10.
Intensive Outpatient Programs (IOP)	A freestanding or Hospital-based program that provides services for at least three hours per day, two or more days per week, to treat mental illness, drug addiction, substance abuse or alcoholism, or specializes in the treatment of co-occurring mental illness with drug addiction, substance abuse or alcoholism. Programs that specialize in the treatment of severe or complex co-occurring conditions offer integrated and aligned assessment, treatment and discharge planning services for mental illness and for drug addiction, substance abuse or alcoholism. It is more likely that Participants with co-occurring conditions will benefit from programs addressing both mental illness and drug addiction, substance abuse or alcoholism than programs that focus solely on mental illness conditions.
Outpatient Electroconvulsive Therapy (ECT)	A treatment that involves brief electrical stimulation of the brain while a member is under anesthesia to treat severe psychiatric disorders and billed by a facility/clinic. It is typically administered anywhere from 2-3 times per week if a member is simultaneously admitted to an inpatient Care Level. However, once the member steps down to an outpatient Care Level, frequency may change to once every 3-4 weeks.
Psychological/Neuropsychological Testing	Psychological testing consists of the administration of psychological tests which measure a sample of a member's behavior. Note: Psychological/Neuropsychological Testing only requires Prior Authorization in some cases. BCBSNM will notify the provider if prior authorization is required for these testing services.

Repetitive Transcranial Magnetic Stimulation (rTMS)		A form of brain stimulation therapy used to treat psychiatric conditions in a facility/clinic setting. A treatment course is usually 1 daily session, 5 times per week for up to 6 weeks, followed by a 3-week taper of 3 rTMS session in week one, 2 rTMS sessions the next week, and one rTMS session in the last week (total of 36 sessions). The treatment course may be repeated after a 6-month cessation period if needed. The therapy cannot be administered on the same day as a PHP, IOP, ECT, or ABA Care Level service.

Prior authorization is required for some members/services/drugs before services are rendered to confirm medical necessity as defined by the member's health benefit plan. A prior authorization is not a guarantee of benefits or payment. The terms of the member's plan control the available benefits.

Usually, the provider is responsible for requesting prior authorization before performing a service if the member is seeing an in-network provider. Sometimes, a plan may require the member to request prior authorization for services.

Once a prior authorization request is received and processed, the decision is communicated to the provider.

If you have questions, call the prior authorization number on the member's ID card.

This is not an exhaustive list of all codes. Codes may change, and this list may be updated throughout the year. The presence of codes on this list does not necessarily indicate coverage under the member benefits contract. Member contracts differ in their benefits. Always check eligibility and benefits first through the Availity® Essentials (availity.com) or your preferred web vendor portal to confirm coverage and other important details, including prior authorization or pre-notification requirements and vendors, if applicable. For some services/members, prior authorization may be required through Blue Cross and Blue Shield of New Mexico (BCBSNM). For other services/members, BCBSNM has contracted with Carelon Medical Benefits Management for utilization management and related services.

Obtaining prior authorization is not a substitute for checking eligibility and benefits.

Availity is a trademark of Availity, LLC, a separate company that operates a health information network providing electronic information exchange services to medical professionals. Availity provides administrative services to BCBSNM.

Carelon Medical Benefits Management is an independent company that has contracted with BCBSNM to provide utilization management services for members with coverage through BCBSNM.

BCBSNM makes no endorsement, representations or warranties regarding any products or services provided by third party vendors such as Availity or Carelon Medical Benefits Management.❏
